Video Captioning at Wentworth Institute of Technology
It's a process!

Video solutions used by faculty and staff:

- Lynda.com
- Films on Demand
- Alexander Street
- Echo360/Active Learning Platform
- Atomic Learning
- VoiceThread
- YouTube
- Possibly many other tools and platforms used by individual faculty and staff

Can we provide captioning when requested by users with disabilities?

- Lynda.com, Films on Demand, Alexander Street and Atomic Learning (with the exception of My Campus Training) are captioned
- YouTube videos and videos used in VoiceThread can be captioned when requested
- Echo360 requires a 3d party captioning vendor integration

What are other questions to consider when providing accommodations?

- What other video production tools and platforms are being used at Wentworth?
- What tools/platforms are we going to support?

Moving towards universal design and captioning most (if not all) videos regardless of accommodation request

Requires design of processes and workflows

- What to caption?
- When to caption?
- Who owns it?
- Who pays for it?
- Which tools and platforms are supported?
- How is it done?
