Two Solutions:

1. Use YouTube Embed code (this should always work):

Edit HTML:

Right Click on Link in existing page and select open link in new window/tab:

On YouTube page click on link to share video:

Click on the Embed icon to reveal the embed code:

Copy the embed code:

With the embed code copied, go back to the Brightspace page and click on the icon to display the HTML in the bottom right corner of the WYSIWYG editor:

| | | | | | G |
|----|---|--|----|----|-----------|
| Ą∕ | • | | ĒQ | 53 | <i>h.</i> |

Look for the following code:

<html><head><meta http-equiv="Content-Type" content="text/html; charset=utf-8"/></head><body>

at the start of the page. Do Not delete this code. There will be a set of <div> tags marking the currently embedded video from Bb and it will end with:

</div>

Highlight the HTML from <div through </div> and paste in the HTML Code from YouTube:

| <iframe wid<br="">frameborde allowfullscr</iframe> | <pre>l><meta content="text/html; charset=utf-8" http-equiv="Content-Type"/><body> h="560" height="315" src="https://www.youtube.com/embed/45veR-Se-rl" title="YouTube video player" ="0" allow="accelerometer; autoplay; clipboard-write; encrypted-media; gyroscope; picture-in-picture" en></body></pre> |

Click Save to embed the new code in the page and test to make sure the video plays correctly.

Solution 2, Use the Brightspace Insert Stuff Button: Edit the HTML for the video page:
